ENERGY EFFICIENCY INCENTIVE AGREEMENT

Disclaimers: Orcas Power & Light Cooperative (OPALCO) hereby disclaims any and all implied warranties (including but not limited to implied warranties or merchantability or fitness for a particular purpose) and shall not be responsible for any representation or promise with respect to the equipment, materials or labor required for the installation of energy efficiency measures on the premises, or the cost of such equipment, materials and labor.

ADDITIONAL CONDITIONS:

1. Rebate form and documentation must be received within 6 months of completed project.
2. Available to OPALCO residential members.
3. Homeowners are responsible for complying with all applicable codes and regulations.
4. Customers doing the work themselves (without a licensed contractor) may be subject to inspection by an OPALCO Energy Advisor at no charge prior to payment of incentives.
5. Incentives less than \$100 are applied as a credit to the member's account; greater than \$100 are paid directly to the member/homeowner by check.
6. OPALCO reserves the right to inspect energy efficiency measures prior to payment and will coordinate inspection as applicable.
7. Please allow 6-8 weeks for processing and payment of incentives.

DEFINITIONS

COMMERCIAL— The Commercial Sector includes electrical energy used in service-providing facilities and equipment of businesses; federal, state and local governments; and other private and public organizations. The Commercial Sector is generally defined as non-manufacturing business establishments including hotels, motels, restaurants, wholesalers, retail stores and health, social and educational institutions.

RESIDENTIAL— The Residential Sector includes electrical energy used in a residential setting (e.g. single-family residences, multifamily residential structures *up to three-stories high** and manufactured homes). Excluded are temporary residences such as hotels, motels, nursing homes, dorms, or any other generally temporary quarters. Multifamily housing greater than three stories high is considered commercial.

INDUSTRIAL— The Industrial Sector includes electrical energy used by fixed pieces of equipment, buildings or complexes to produce, manufacture or store goods in connection with, or as part of, any process (including transportation) or system (including those related to food production). These processes also include, but are not limited to, the following: electrical distribution system, hardware; Voltage Optimization; water/waste-water production and treatment; and data centers/server farms (except commercial sector data centers/server farms - i.e. those integrated into a commercial building that serve the information technology needs of the business enterprise). In general, Industrial Sector activities must not devote the majority of energy use within a facility to non-process related HVAC or potable hot water.

By signing below, I represent that all of the information on this form is true and agree to open my home to random inspections for quality control purposes by an OPALCO representative. I have read, understood and agreed to the terms and conditions of this rebate and certify that the measures described above have been installed at the location indicated and that there is a permanently installed electric heat source at this location.
